

## RIF Worldwide GLASGOW Opens for Business

The continued growth and success of RIF Worldwide is due to continue further with importers and exporters in Scotland being able to take advantage of the multiple-award winning service via the newly opened RIF Worldwide Glasgow office.

Located in Paisley, close to Glasgow airport, the new office will provide the same comprehensive portfolio of international logistics services on offer at all RIF Worldwide offices – import/export via air/ocean, worldwide courier services, customs clearances at all major ports/airports, duty consultancy and warehousing & distribution services.

The new branch office will be jointly run by David Woodall and Russell MacGilvray, who bring with them many years experience of the local market.

Speaking about the new office opening, Scott Sully, RIF Worldwide Managing Director said: "Scotland is a growing and important market in the UK and the local knowledge that David and Russell possess, coupled with the award winning service standards and products that RIF Worldwide has, will provide importers and exporters in the region with a real market advantage against their competitors".

Woodall added, "There is a definite gap in the market in Scotland for a company to provide innovative solutions and I think we have a powerful combination of services and skills that can fill that gap. The office is fully operational and we are aggressively seeking companies who want to improve their supply chain. Any company who is serious about improving their business supply chain should be speaking to us".

The growth of RIF Worldwide in the UK has been 100% organic, with no 'strategic mergers' or buyouts playing a part in the growth figures. RIF Worldwide was recently listed in the The Sunday Times as one of the fastest growing companies in the UK. January 2009 saw RIF Worldwide win a further two service excellence awards from the industry governing body BIFA. Since UK inception in 2002, RIF Worldwide has won more BIFA service excellence awards than any other freight forwarding and logistics company.
